

Instructions - Play this traditional game with all of your friends from LazyTown!

Start

Forty eight domino cards are laid face downward on the table and shuffled. Each player now takes 4 domino cards and lays them "open" (with the picture visible) in front of him/her. The rest of the dominoes remain where they are (the pot). The youngest player begins and lays a domino card face upwards.

Further course of the game

The player on the right has the next turn, etc. He/she tries to put a domino card alongside the previous card. This can only be done if the two matching pictures can be laid together. If it is a double (two equal pictures on one card), the player is allowed to immediately lay another one. If a player cannot lay a domino card, he/she takes one out of the pot. If the player can lay it down, he/she does so immediately. If the player cannot, he/she lays the domino card in front of him/her and the turn goes to the player on the right.

Winner

The player who has laid down all his/her cards first is the winner or, in certain cases, the player that has the least domino cards left when the pot is empty is the winner.

Contents: 48 domino cards.

Have fun!
